

Mobile Mentor is an independent provider of mobile management services for enterprises.

Our services are built on 3 pillars:

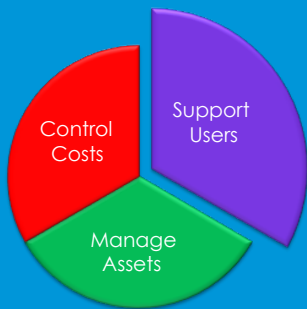

- 24/7 User support
- Asset management
- Cost control

Mobile technology offers enterprises tremendous opportunities to engage with customers through innovative apps and services.

However most enterprises are preoccupied with internal priorities and struggle to find the time and budget to do the innovation.

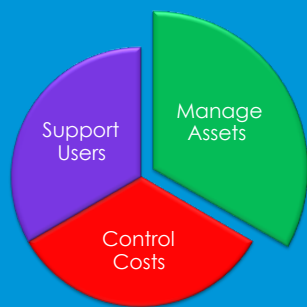

Mobile Mentor helps the IT department regain control of the mobile environment, empower internal users, free up budget and people to innovate, and leverage mobile as a channel to customers.

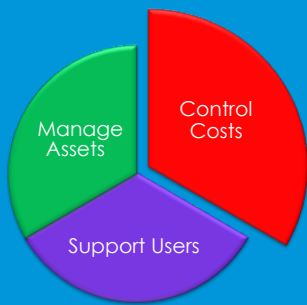

"Best service I've ever had from any telco anywhere"

John Mitchell

"Back up and running in hours"

"Break-even within 90 days"

Support Users

Mobile Mentor supports business clients with our 24/7 service desk for everything mobile. Our systems, processes and deep expertise enable us to achieve >90% first-call-resolution which keeps your users productive.

In addition we provide our award winning mentoring service, which allows employees to get the most out of their new smartphone or tablet through a personalised mentoring session.

Manage Assets

Mobile Mentor provides an end-to-end mobile asset management service including Mobile Device Management (MDM) which brings control and security to a multi-platform environment.

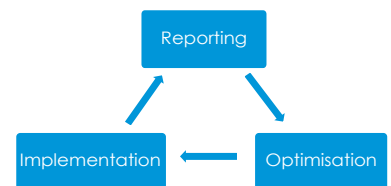

In addition, we manage the hardware lifecycle for all smartphones and tablets including procurement, provisioning and advance replacement of faulty devices.

Control Costs

We leverage our analytics framework and industry knowledge to control your cost profile. Our Mobile Expense Management (MEM) service typically achieves annual cost savings of 15% - 30%. It is based on a consistent monthly approach called R-O-I:

- 1) Report the trends and insights
- 2) Optimise price plans and usage
- 3) Implement appropriate changes on the network and the device

The Mobile Mentor Value Proposition

Mobile Mentor has an outstanding track record in mobile service delivery, helping enterprise clients to:

- Regain control of mobile costs and assets
- Increase user productivity
- Release people and budget to innovate

Our 15R™ service can be implemented with minimal effort and is backed by a 90-day break-even guarantee!
