

CUSTOM MOBILE APPS WITH ENTERPRISE-GRADE SECURITY AND WORLD-CLASS SUPPORT

Mobile Mentor develops custom mobile apps that save time, money and lives. Our apps are built with enterprise-grade security and we provide world-class support.

App Development

We are experts in both hybrid & native app development. For hybrid apps, we use common web technologies delivered in a native app shell to access all the capabilities of the mobile device.

We build iOS & Android leveraging the latest platform-specific code libraries.

For enterprises with Microsoft 365, we use PowerApps and leverage the common data model.

Security

We build apps with embedded security at every layer including the API, data storage and user authentication.

AppConfig, app-wrapping and Single Sign-On are important considerations to balance usability and security.

We secure the user, data and device with Microsoft Intune, VMware, MobileIron and Citrix XenMobile.

Support

We provide three levels of support for mobility:

Level 1: We support your end-users with their apps, mobile devices and mobile connections through our 24x7 support center.

Level 2: We support your mobile security and app deployments through our team of certified engineers.

Level 3: We analyze, troubleshoot and resolve app performance issues through our app development team.

Apps Lifecycle Management

- Define the use-cases and business outcomes
- Design the User Experience & User Interface
- Develop minimum viable products and APIs
- Test and refine with end-user champions
- Deploy the app with appropriate security policies
- Support users through our 24x7 Service Desk
- Measure and report on app performance
- Manage the app through its lifecycle

Accelerate your mobile development by partnering with Mobile Mentor

People

Mobile Mentor is 100% focused on enterprise mobility. Our people are passionate about all things mobile and they provide our clients with depth and experience.

Experience

We have 14 years experience in enterprise mobility and we have provided solutions for over 1 million people.

Customers

Mobile Mentor is trusted by large healthcare providers, forestry companies, banks, airlines, utilities and government agencies. They rely on us for enterprise app development, security solutions and mobility support.

Partners

Mobile Mentor has partnered with global leaders for app solutions: Apple, Google, Amazon Web Services and Microsoft.

Security

We partner with AirWatch, MobileIron, Citrix and Microsoft to securely deploy and manage our clients' apps.

Some of the clients we are proud to work with include:
