

# Security Services

Unlock the Full Potential of Microsoft Security

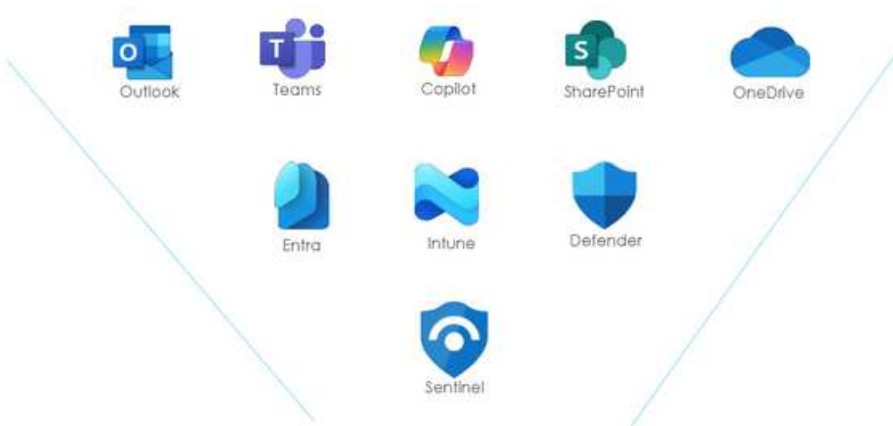

We help businesses modernize their security architecture with the Microsoft Security ecosystem.

Our approach simplifies your stack, reduces reliance on hard-to-find security specialists, and uses AI-driven tools to protect all identities, devices, and data.

Many organizations rely on fragmented tooling, which creates complexity, drives up costs, and increases the demand for scarce cybersecurity talent.

By consolidating tools around the Microsoft ecosystem, we enable faster threat detection, reduced operational complexity, and a unified, AI-driven security posture.

“Working with Mobile Mentor was a great experience. The fact that the team had done this many times before and could guide us on what works, and what doesn’t work, based on experience with others, was greatly beneficial.”

**Andrew Hutchinson, CISO**  
Vanderbilt University  
Medical Center

**Microsoft**

Partner of the Year 2021

Finalist 2022-2025

## Services Include:

### Microsoft Defender Suite

- Endpoint protection and vulnerability scans
- Cloud App Security & Governance
- 24x7 auto remediation

### Microsoft Sentinel

- Cloud-native SIEM and SOAR
- Real-time analytics and automated response
- 24x7 monitoring

### Microsoft Purview

- Data sensitivity labeling (AI-ready)
- Data governance and compliance
- Insider risk management and data protection

### Email & Teams Security

- Safe attachments and safe links
- Anti-phishing and malware defense
- Mobile app management on BYO devices

“Mobile Mentor redefined the scope of what we were hoping to do in a way that was certain to succeed.”

**Steven Petrenko**  
General Manager, IT  
Neami National
